11th Conference of the Global Harmonization Task Force

Marking the 15th Anniversary since the founding of the Global Harmonization Task Force (GHTF), the 11th Conference brings together international medical device regulatory harmonization leaders to examine past accomplishments and future directions. Themed, GHTF and International Harmonization: The Future Is Now, this year's Conference comes at a pivotal time in GHTF's history: a time for reflection and strategic planning.

Conference goals are to: (1) evolve GHTF from a consensus development organization to an action-oriented organization dedicated to effecting significant change in medical device regulatory practices world-wide; and (2) reach agreement on a path forward for the GHTF and its future.

Who should attend?

All Founding Members. Members of regional harmonization working groups. Medical device regulators, industry professionals and standards-setting experts interested in learning more about the GHTF and how its efforts are serving the world community.
